ANDREAEX EXHAUST FILTERS, 20 X 20, 20-25, 36" X30'

AEROSPACE 319 FILTERS ARE specifically created for the collection of aerospace chromate coating overspray, virtually eliminating dangerous chromium emissions up the stack. This three-stage system is also easily adapted to older, two-stage paint finishing lines. It exceeds E.P.A. Method 319 emission standards.

Ceiling diffusion

A one-inch layer of scrim backed, fine denured polyester with a non-migrating tackifier throughout the filter. Available in panels, links, single layered pads, blankets, and rolls.

PAINT POCKETS

Paint Pockets Green is your best value for production spray booths. **Paint Pockets Green** is specially engineered to filter both liquid and powder coating overspray generated in industrial applications. This filter is specifically designed and priced to replace expanded paper, fiberglass and other lower efficient lower cost filters.
